 **TEKSAN** UK

EVERLASTING COMPANY

WHENEVER YOU NEED POWER,
WE ARE ALWAYS WITH YOU... **SINCE 1994!**

Since 1994, Teksan Generators have been supplying high performance, bespoke power solutions based on clients' requirements. With strong after-market department, Teksan are dedicated to support its clients 24/7. Whilst your company is moving forward, Teksan are only one call away from you.

SOLUTIONS WE PROVIDED

2 x 232 Teksan UK generators to Anfield Stadium on Road Tow Trailers, 1 x 330 Stand By Diesel Generator. The Generators power the LFC Fan Zone and other areas on Match Days - Running Continuously for 8-10 hours.

SOLUTIONS WE PROVIDED

Teksan supplied, commissioned and installed a 230 kVA Diesel Generator in London, Kings Cross.

SOLUTIONS WE PROVIDED

A number of 830 kVA Doosan powered Teksan Generators were supplied to a retail giant, ASDA Supermarkets, UK. We supplied a 24 hour extended fuel tank on a bunded base frame which is DEFRA compliant.

SOLUTIONS WE PROVIDED

500 kVA Teksan UK Generator was supplied and Installed by Wallace Power at a Call Centre in Glasgow.

SOLUTIONS WE PROVIDED

2 x 830 kVA Doosan Powered Synch sets were Provided successfully to a Hospital located in London, United Kingdom. The client had put the machines in special built acoustic containers which achieve 65 dba at 1 meter.

SOLUTIONS WE PROVIDED

90 kVA generator mounted on a twin axle chassis for a concrete drilling company complete with IP66 outlet sockets and mcb protection.

SOLUTIONS WE PROVIDED

1 x 330 kVA Teksan UK Generator was supplied to a well-known transportation company based in Burton by our North West Dealer, FW POWER. The diesel generator set is used as a backup power for offices. If the power goes out in the middle of a day, the generator kicks in and let people continue getting on with their jobs without interruption! A typical backup power equipment by Teksan UK.

SHORT TERM OPERATIVE RESERVE

SOLUTIONS WE PROVIDED

8 x 584 kVA Teksan UK generators exporting 4.7 MW to the grid 24/7, 365 days per year, running on bio diesel. The DNO was UKPN and the total project included transformers, switchgear and the DNO metering unit. EME Power Solutions Ltd. supplied the diesel generators to FW Power.
